The Original Man is the Black man. God (Allah) appeared in the person of Wallace Fard Muhammad in 1930.

Example: Elijah Muhammad taught: God is a man and we just cannot make Him other than a man. Fard Muhammad was God in person. This directly contradicts Sunni tawhid (God is transcendent, not incarnate) and is THE primary theological break with orthodox Islam.

2. Yakub Mythology

A scientist named Yakub created the white race 6,600 years ago through selective breeding on the island of Patmos. White civilizations 6,000-year rule is ending.

Example: This is the T a counter-narrative to European supremacist history. The white man is the devil (Elijah Muhammad) is not metaphor but literal theology in original NOI teaching. This racial cosmology has no parallel in orthodox Islam.

3. Economic Nationalism

Do for Self Black economic independence through community-owned businesses, farms, and institutions.

Example: NOI operated bakeries, restaurants, farms (thousands of acres in Georgia), a newspaper (Muhammad Speaks / The Final Call), clothing stores, fish markets. This is O governance economic self-determination as religious duty.

4. Fruit of Islam (FOI)

The male disciplinary wing of NOI provides security, discipline, martial training, and community enforcement.

Example: FOI members are immediately recognizable: dark suits, bow ties, clean-shaven, disciplined bearing. They provide security at NOI events, patrol communities, and enforce internal standards. The FOI IS the operational enforcement arm.

5. Dietary and Behavioral Code

Strict dietary law (no pork, one meal per day recommended), no alcohol, no drugs, no tobacco, modest dress, marital fidelity.

Example: The How to Eat to Live dietary program (from Elijah Muhammad) predates the modern health food movement. Clean living IS operational governance of the body. This parallels SDAs health message both American movements governing the body.

6. Temple/Mosque Structure

Hierarchical organization under the office of the Supreme Minister. Louis Farrakhan led NOI from 1981; succession remains an open question.

Example: Local mosques (numbered: Mosque #7 in Harlem, Mosque #27 in Los Angeles), regional ministers, national spokesman, Supreme Minister. The General Conference (SDA) parallels NOIs centralized structure. Both are American-founded, hierarchically organized, socially disciplined.

Constraints

MUST: Cite NOI source (Elijah Muhammad, Farrakhan) for doctrinal claims

MUST: Distinguish NOI theology from orthodox Sunni/Shia Islam

MUST NOT: Conflate NOI with Warith Deen Mohammed's orthodox movement
