

VOCAB CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

One term, one definition, at the highest scope. Children inherit, not duplicate.

hadleylab.org Governed Research. Every claim cited.

service = VOCAB
primitive = INTEL
function = NORMALIZE

1. Constraints

- MUST: Single canonical definition per term at high level
- MUST: All terms SCREAMING_CASE
- MUST: No empty definitions (| TERM | |)
- MUST: inherits: header resolves to a valid parent Vocab
- MUST: Child VOCAB.md adds only scope-specific terms
- MUST: validate-vocab runs in build pipeline hard fail
- MUST NOT: Duplicate a parent term with identical definition
- MUST NOT: Redefine a parent term with conflicting definition
