Contents

0.1	2. Measurement-Based Care . . .	1
0.2	3. Safety Assessment	1
0.3	4. Privacy Enhancement	1
0.4	5. Collaborative Care	2

All diagnoses MUST meet DSM-5 or ICD-11 criteria with documented symptom assessment.

Diagnosis requires:

- Symptom inventory
- Duration criteria met
- Functional impairment documented
- Rule-out conditions considered
- Differential diagnosis documented

0.1 2. Measurement-Based Care

Treatment MUST be guided by validated outcome measures administered at regular intervals.

Required measurements:

- Baseline assessment before treatment
- Progress monitoring (typically q2-4 weeks)
- Treatment response evaluation
- Remission/recovery criteria tracking

0.2 3. Safety Assessment

Suicide and violence risk MUST be assessed and documented at each encounter.

Safety assessment includes:

- Suicidal ideation (SI)
- Suicidal intent and plan
- Access to means
- Protective factors
- Risk stratification
- Safety planning

0.3 4. Privacy Enhancement

Mental health records MUST comply with enhanced privacy protections (42 CFR Part 2 for substance use).

Enhanced protections:

- Explicit consent for disclosure
- Segmented records capability
- Audit trail for access
- Minimum necessary principle
- Re-disclosure prohibition notice

0.4 5. Collaborative Care

Treatment **MUST** involve care coordination when multiple providers are involved.

Collaboration includes:

- Primary care integration
- Specialist referrals
- Care manager coordination
- Family involvement (with consent)
- Crisis services linkage
