

STAR CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

STAR is your personal portal in the GALAXY. INTEL + CHAT + COIN composed into a unified personal surface. The TIMELINE is the joint lane for all cross-axiomatic intel.

hadleylab.org Governed Research. Every claim cited.

Contents

STAR is the governed personal cloud. GALAXY shows the organizational topology. STAR shows the personal topology. Every USER gets a STAR. The TIMELINE joins all temporal data across all three primitives into one chronological stream.

Constraints

MUST: Compose all three primitives (INTEL + CHAT +
MUST: Discover USER's GOV tree via magic scan never
MUST: TIMELINE is a read-only JOIN across existing
MUST: TIMELINE envelope compatible with LEDGER .id
MUST: Every lane WIRES to existing services never
MUST: Auth-gate all personal data (VAULT, WALLET, I
MUST: GOV lane is public (compliance rings are the
MUST: Discover services via magic scan (TALKS/*/CA
MUST: Aggregate LEARNING patterns from all user sc
MUST: Surface compliance ring (8 MAGIC dimensions)
MUST: Publish STAR-TIMELINE.json via build pipelin
MUST: NETWORK service declare routes on api.canon
MUST NOT: Write to source event streams (VAULT, LEDGER
MUST NOT: Duplicate WALLET, SHOP, VITAE, or LEARNING s
MUST NOT: Hardcode lane sources discover via GOV tree
MUST NOT: Expose private data (VAULT, CALENDAR, NOTIFI
