

PAPERS CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

PAPERS are governed academic artifacts. Each paper IS a scope. SPEC = {SCOPE}.

hadleylab.org Governed Research. Every claim cited.

Contents

A paper is a timestamped intellectual disclosure with verifiable structure. Every claim cited. Every method reproducible. The .md is the source. The compiled surface renders TOC, figures, appendices, and math. PDF export with LaTeX hidden.

Constraints

- MUST: Every paper declares front matter (title, data)
- MUST: Papers follow section structure: Abstract, Table of Contents
- MUST: PAPERS.json index is compiled from paper front matter
- MUST: CANON.json is compiled never hand-edited
- MUST: Paper content maps to governed work (LEDGER)
- MUST: Math renders via LaTeX (KaTeX) formulas are verifiable
- MUST: Figures are data-driven (JSON config, not images)
- MUST: PDF export compiles from the same .md source
- MUST: Papers with compiled PDF render all views (GitHub, PDF, WEB)
- MUST: WEB view is 1-col scrolling (like blog posts)
- MUST NOT: Hand-edit compiled outputs (PAPERS.json, CANON.json)
- MUST NOT: Publish ungoverned claims (every assertion needs evidence)
- MUST NOT: Embed presentation logic in paper source (DEVELOPMENT)
