Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

BOOKS are governed long-form artifacts. Each book IS a scope with PARTS and CHAPTERS.

hadleylab.org Governed Research. Every claim cited.

Contents

1 Constraints

1

Books transform LEDGER evidence and MAGIC discoveries into structured, publishable prose. A book is a scope the .md IS the specification. The build pipeline compiles books from .md source into rendered HTML (with TOC, PARTS, CHAPTERS, figures, math) and BOOKS.json index. PDF export uses LaTeX backend on the same source.

1. Constraints

- MUST: Every book declares front matter (title, date)
- MUST: Books follow structure: PARTS CHAPTERS sections
- MUST: BOOKS.json index is compiled from book frontmatter
- MUST: CANON.json is compiled never hand-edited
- MUST: Book content maps to governed work (LEDGER content)
- MUST: TOC auto-generated from PARTS and CHAPTERS headers
- MUST: PDF export compiles from the same .md source
- MUST NOT: Hand-edit compiled outputs (BOOKS.json, CANON.json)
- MUST NOT: Publish ungoverned claims (every assertion needs evidence)
- MUST NOT: Embed presentation logic in book source DESCRIPTION
