

SEMANTIC CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

Every term resolves. Every chain closes. Every score reflects reality.

hadleylab.org Governed Research. Every claim cited.

Contents

1 Constraints

1

Structural validation (file existence) is necessary but not sufficient. SEMANTIC enforces vocabulary closure, inheritance integrity, and coverage alignment the three properties that make governance trustworthy beyond shape.

1. Constraints

- MUST: Close vocabulary every SCREAMING_CASE term
- MUST: Resolve inheritance chains every inherits p
- MUST: Align COVERAGE scores with reality dimension
- MUST: Flag stub terms VOCAB definitions of "" or
- MUST: Cascade resolution upward if a term is not
- MUST NOT: Claim COVERAGE PASS for dimensions backed by
- MUST NOT: Allow circular inheritance inherits chains
- MUST NOT: Silently ignore undefined terms every unres
- SHOULD: Report cross-scope term drift same SCREAMING
