

CONTROLS CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

CONTROLS is the unified control interface for all content surfaces. Five dimensions: talk position, download assets, view mode, available views, content gate. Every control in the bar acts on the content it controls within the same page, within the same context. GOV declares. Compiler emits. Theme renders.

1 Constraints

1. Constraints

1

- MUST: Declare controls per surface_type in SURFACE
- MUST: Compiler discovers defaults from SURFACE.json
- MUST: Compiler merges CANON.md header overrides with
- MUST: Emit resolved controls to front matter (talk
- MUST: Theme reads front matter only zero layout-s
- MUST: Every nav-right control acts on content with
- MUST: Gate anchor uses event.preventDefault + scro
- MUST NOT: Hardcode control behavior in theme layouts
- MUST NOT: Hardcode per-type defaults in compiler
- MUST NOT: Navigate away from the page all controls ar
