

PROTECTION CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

No commit reaches main without passing the 255 gate.

hadleylab.org Governed Research. Every claim cited.

Contents

Branch protection is the transport-layer enforcement of governance scoring. Without it, MAGIC 255 is advisory not a gate.

1 Constraints

1

1. Constraints

- MUST: Require magic-validate status check to pass
- MUST: Require at least one approving review before
- MUST: Block force pushes to main in all GOV repos
- MUST: Block branch deletion for main in all GOV rep
- MUST: Enforce status checks for administrators (no
- MUST: Maintain CODEOWNERS file mapping all paths t
- MUST NOT: Allow direct push to main without PR (except
- MUST NOT: Allow --no-verify to bypass pre-commit hooks
