

CANONIC-TYPESCRIPT CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

TYPESCRIPT = Web runtime wrapper for MAGIC kernel interfaces.

hadleylab.org Governed Research. Every claim cited.

Contents

TypeScript provides governed web and frontend integration around core enforcement.

Constraints

1. TYPESCRIPT MUST wrap kernel interfaces without duplicating enforcement.
 2. TYPESCRIPT MUST preserve governance parity with other runtimes.
 3. TYPESCRIPT SHOULD expose stable interface contracts.
