

DEVELOPERS CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

DEVELOPERS is the certification surface every certified developer is discoverable, every credential verifiable, and git proves it.

hadleylab.org Governed Research. Every claim cited.

Contents

- **DEVELOPER_IS_DISCOVERABLE** certified developers are enumerated by walking the GOV tree (VITAE + cert/ tags), never by hand-curated lists.
- **CREDENTIAL_IS_VERIFIABLE** every tier badge resolves to a matching cert/ tag in TAGS.md; uncertified developers do not appear.
- **GIT_PROVES_IT** the audit trail is the commit history; certification is earned on-chain, not claimed. ## Constraints

MUST: Discover developers from GOV tree walk VITAE
MUST: Compile to _data/developers.json via build-s
MUST: Render on FOUNDATION site with tier badges
MUST: Every listed developer has a matching cert/
MUST NOT: List uncertified developers
MUST NOT: Hardcode developer lists discover from GOV
MUST NOT: Hand-edit developers.json fix the compiler
