

CANONIC-PYTHON CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

PYTHON is the ancestral runtime the server, the intelligence, the canonical HTTP surface.

hadleylab.org Governed Research. Every claim cited.

Contents

- **PYTHON_IS_ANCESTRAL** Python is the ancestral runtime from which other runtimes neo-functionalize; it defines the shape.
- **PYTHON_IS_SERVER** the canonical HTTP interface is served from Python; other runtimes consume it.
- **SCORING_IS_GOVERNED** scoring logic is read from governed configuration; no paths or module names are hardcoded in law. ## Constraints

MUST: Serve as the canonical HTTP interface

MUST: Read scoring logic from governed configuration

MUST NOT: Hardcode paths or module names in law
