

CANONIC-SWIFT CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

SWIFT is the Apple-native compliance runtime the mobile SHOP, neofunctionalized from Python for declarative UI.

hadleylab.org Governed Research. Every claim cited.

Contents

- **IOS_NATIVE_IS_APPLE** the Swift runtime is the Apple-ecosystem compliance surface for iOS and macOS; it powers the mobile SHOP.
- **SWIFTUI_IS_DECLARATIVE** SwiftUI enables declarative compliant interfaces bound to the same spec as every other runtime.
- **NEOFUNCTIONALIZED_FROM_PYTHON**
Swift is neofunctionalized from Python (ancestral) for Apple-native execution while implementing the full compliance specification.
Constraints

1. SWIFT MUST validate against SPEC.
2. canonic-swift MUST implement the full compliance specification.
3. canonic-swift MUST integrate with SwiftUI.
4. canonic-swift SHOULD power iOS SHOP.
5. canonic-swift MAY use Swift Concurrency.
