

CREDENTIALING CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

INDUSTRY is the variable in the SERVICE equation every vertical wires primitives into a governed domain.

hadleylab.org Governed Research. Every claim cited.

Contents

0.1	1. Primary Source Verification . . .	1
0.2	2. Continuous Monitoring	1
0.3	3. Jurisdictional Compliance	1
0.4	4. Expiration Management	2

- **INDUSTRY_IS_VARIABLE** SERVICE equals PRIMITIVE composed with INDUSTRY; swap the industry, get a new service.
- **EVERY_INDUSTRY_WIRES_THREE** each vertical wires INTEL, CHAT, and COIN before it counts as governed.
- **LANGUAGE_CASCADES_FROM_MAGIC** industry language inherits from MAGIC; no per-industry DESIGN or lexicon fork. ## Axioms

0.1 1. Primary Source Verification

All credentials **MUST** be verified from primary sources. Self-attestation is insufficient.

Primary Sources:

- Medical license: State medical board
- DEA: DEA CSOS
- NPI: NPPES registry
- Board certification: ABMS/AOA
- Education: Medical school, residency
- Malpractice: NPDB, state records

0.2 2. Continuous Monitoring

Credentials **MUST** be monitored continuously, not just at enrollment.

Monitoring frequency:

- License status: Monthly
- Sanctions: Monthly (OIG, SAM, state)
- Board actions: Monthly
- Malpractice claims: Quarterly

0.3 3. Jurisdictional Compliance

Provider privileges **MUST** match jurisdictional requirements.

Requirements by jurisdiction:

- State: Medical license, controlled substance
- Federal: DEA, Medicare enrollment
- Payer: Network participation
- Facility: Medical staff privileges

0.4 4. Expiration Management

All time-bound credentials MUST be tracked with renewal workflows.

Tracked expirations:

- Medical license (1-3 years)
- DEA registration (3 years)
- Board certification (10 years)
- CME requirements (per state)
- Malpractice insurance (annual)
