Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

INDUSTRY is the variable in the SERVICE equation every vertical wires primitives into a governed domain.

hadleylab.org Governed Research. Every claim cited.

Contents

0.1	1. mCODE Conformance	1
0.2	2. Staging Integrity	1
0.3	3. Treatment Protocol Binding . . .	1
0.4	4. Tumor Board Documentation . .	1
0.5	5. Outcomes Tracking	2

- **INDUSTRY_IS_VARIABLE** SERVICE equals PRIMITIVE composed with INDUSTRY; swap the industry, get a new service.
- **EVERY_INDUSTRY_WIRES_THREE** each vertical wires INTEL, CHAT, and COIN before it counts as governed.
- **LANGUAGE_CASCADES_FROM_MAGIC** industry language inherits from MAGIC; no per-industry DESIGN or lexicon fork. ## Axioms

0.1 1. mCODE Conformance

All oncology data MUST conform to mCODE (minimal Common Oncology Data Elements).

Required mCODE profiles:

- CancerPatient
- PrimaryCancerCondition
- TNMStageGroup
- CancerRelatedProcedure
- CancerRelatedMedicationStatement
- TumorMarker
- GenomicsReport
- CancerDiseaseStatus

0.2 2. Staging Integrity

Cancer staging MUST use standardized systems (AJCC TNM) and be documented at diagnosis and restaging events.

0.3 3. Treatment Protocol Binding

Treatment recommendations MUST reference NCCN guidelines or institutional protocols with version numbers.

0.4 4. Tumor Board Documentation

Multidisciplinary tumor board discussions MUST be documented with attendees, recommendations, and rationale.

0.5 5. Outcomes Tracking

Patient outcomes (response, progression, survival) MUST be tracked using RECIST or disease-specific criteria.
