

# RECOVERY CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

---

## Abstract

RECOVERY guarantees CANONIC survives any single point of failure hardware, account, or provider.

---

**hadleylab.org** Governed Research. Every claim cited.

## Contents

- **GOVERNANCE\_IS\_TRUTH** if governance is lost everything downstream is unrecoverable, so GOV repos are the first thing protected.
- **OFFSITE\_MULTI\_REGION** offsite backups of every GOV repo are maintained across at least two geographic regions; LEDGER and VAULT back up independently.
- **RESTORE\_IS\_TESTED** restore runbooks are documented and tested quarterly; CI dependencies are version-pinned so the restore is reproducible. ## Constraints

MUST: Maintain offsite backup of all GOV repos (min  
MUST: Backup LEDGER and VAULT independently of GOV  
MUST: Test restore from backup quarterly (next: 20  
MUST: Document restore runbook in this scope  
MUST: Version-pin all CI dependencies (no floating  
MUST: Maintain local clones of all GOV repos (CANON  
MUST NOT: Store backup credentials in governance tree  
MUST NOT: Depend on a single provider for all copies (
