

CANONIC-APPLE CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

canonic-apple is the Apple-platform SURFACE client iOS and macOS integration, governed upstream, rendered natively.

hadleylab.org Governed Research. Every claim cited.

Contents

- **APPLE_IS_PLATFORM** this ORG is the Apple-platform integration point for iOS and macOS; role = PLATFORM, domains = SAFETY.
 - **SURFACE_IS_NATIVE** rendering is native SwiftUI with governance compiled upstream; the API layer is shared with every other surface.
 - **ORG_INHERITS_GALAXY** the ORG inherits from canonic-canonic/MAGIC/GALAXY/ORGs and is a deploy target, not an identity source.
- ## Constraints

MUST: ORG declares governance scope and domains
MUST: ORG inherits from GALAXY/ORGs

CANONIC-APPLE | CANON | ORGS
