

CAMPAIGN CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

CAMPAIGN is the event-to-emission framework one event, all platforms, governed cascade.

hadleylab.org Governed Research. Every claim cited.

Contents

- **EVENT_TO_EMISSION** the pipeline is EVENT ROLES CASCADE EXECUTE LEARN; every campaign follows this ordered sequence.
- **ROLES_ARE_EXCLUSIVE** each platform is assigned exactly one role (LEAD, AMPLIFY, DEEPEN, DISCOVER); LEAD emits first, no platform publishes before LEAD.
- **METRICS_CLOSE_LOOP** every emission is recorded as a governed artifact and post-campaign metrics write back to LEARNING.md so the next campaign inherits evidence. ## Constraints

MUST: Follow EVENT ROLES CASCADE EXECUTE LEARN

MUST: Assign each platform exactly one role (LEAD,

MUST: LEAD emits first no platform publishes before

MUST: Record every emission as governed artifact

MUST: Write post-campaign metrics to LEARNING.md

MUST: Ledger every emission

MUST NOT: Duplicate content across platforms each add

MUST NOT: Publish without preflight validation
