

COIN CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

COIN is the economic shadow of WORK every mint ledgered, every burn evidenced, supply ceiling validated on every build.

hadleylab.org Governed Research. Every claim cited.

Contents

- **COIN_SHADOWS_WORK** COIN is the economic shadow of WORK; every unit minted traces back to a unit of governed effort.
- **MINT_IS_LEDGERED** every mint and burn is ledgered with fixed shape (id, prev, ts, event, actor, scope, work, hash); no mint without evidence.
- **SUPPLY_CEILING_ENFORCED** the supply ceiling is validated on every build; inflation beyond governed WORK is a build failure. ## Constraints

MUST: Ledger every mint and burn

MUST: Evidence-back every token

MUST: Record shape: id, prev, ts, event, actor, scope, work, hash

MUST: Validate supply ceiling on every build

MUST NOT: Mint without evidence

MUST NOT: Mutate ledger history
