

CONTACTS CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

CONTACTS is the resolution spine. every identifier resolves to a node, every node carries INTEL, every service resolves through CONTACTS.

hadleylab.org Governed Research. Every claim cited.

Contents

- **IDENTIFIER_RESOLVES_TO_NODE** email, phone, and name all resolve to a governed node through the CONTACTS resolution index.
- **RESOLUTION_API_SHARED** CONTACTS provides the resolution API for CALENDAR, TRANSCRIPT, and messaging services; all of them resolve through here.
- **FUZZY_MATCH_NOT_DROP** unmatched contacts resolve to candidate nodes via fuzzy match rather than being silently dropped.
- **PRIVATE_DATA_AUTH_GATED** private contact data is auth-gated and cross-referenced against governed USERS identity. ## Constraints

MUST: Build resolution index: emailnode, phonenode

MUST: Cross-reference against USERS/ governed identity

MUST: Provide resolution API for CALENDAR, TRANSCRIPT, and messaging services

MUST: Resolve unmatched contacts to candidate nodes via fuzzy match

MUST: Auth-gate private contact data

MUST NOT: Duplicate USERS/ identity governance (CONTACTS)

MUST NOT: Hardcode contact mappings

MUST NOT: Expose raw contact data to public surfaces
