

LEDGER CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

LEDGER is the append-only truth every economic event recorded, hash-chain intact, no erasure, every record projects to LEARNING.

hadleylab.org Governed Research. Every claim cited.

Contents

- **APPEND_ONLY** economic events are recorded with timestamps and never retroactively modified; erasure is not allowed.
- **HASH_CHAIN_INTEGRITY** the ledger maintains hash-chain integrity end-to-end; a broken chain is a build failure.
- **LEDGER_IS_INTEL** every ledger record is INTEL; on ingestion it projects to scope LEARNING and backpropagates patterns as gradients. ## Constraints

MUST: Record all economic events with timestamps
MUST: Maintain hash-chain integrity
MUST: Every ledger record is INTEL project to scope
MUST: Backpropagate patterns LEARNING.md accumulation
MUST NOT: Allow retroactive modification of ledgered events
MUST NOT: Ingest without INTEL projection every record
