

NAS CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

NAS is the local canonical store every transcript archived, every media file served, every backup governed, single source of truth for content outside git.

hadleylab.org Governed Research. Every claim cited.

Contents

- **NAS_IS_OUT_OF_GIT_SOT** NAS is the single source of truth for content that lives outside git (transcripts, media, backups).
- **EVERY_TRANSCRIPT_ARCHIVED** all transcripts are archived; media is served from governed paths only.
- **NO_UNGOVERNED_CONTENT** ungoverned content is not allowed on NAS and NAS paths are never exposed on public surfaces. ## Constraints

MUST: Archive all transcripts

MUST: Govern all backups

MUST: Serve media from governed paths

MUST NOT: Allow ungoverned content on NAS

MUST NOT: Expose NAS paths on public surfaces
