

SEO CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

SEO is URL governance every page declares its canonical, every surface indexed under its serving domain, 255 or reject.

hadleylab.org Governed Research. Every claim cited.

Contents

- **CANONICAL_DECLARED_PER_PAGE** every page declares its canonical URL; undeclared canonicals fail the gate.
- **INDEXED_UNDER_SERVING_DOMAIN** surfaces are indexed only under the domain they serve; cross-domain indexing is rejected.
- **SITEMAP_GOVERNED_ONLY** sitemaps reference governed URLs only; all URLs are validated to return 200 before publish.
- **FAIL_CLOSED_255** ungoverned URLs are never indexed; 255 or reject. ## Constraints

MUST: Declare canonical URL per page
MUST: Index under serving domain only
MUST: Sitemap references governed URLs only
MUST: Validate all URLs return 200 before publish
MUST NOT: Index ungoverned URLs
MUST NOT: Allow duplicate canonicals across surfaces
