

USER CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

USER governs identity every person onboarded, every credential verified, every contribution ledgered, identity portable across ORGs.

hadleylab.org Governed Research. Every claim cited.

Contents

- **EVERY_USER_GOVERNED** every person under USERS/ has a CANON.md; identity is declared, not implicit.
- **CREDENTIAL_VERIFIED** identity is verified before write access and every professional claim is evidenced in VITAE.md.
- **FEDERATED_IDENTITY** federation identity is portable across ORGs; each ORG owns its projection.
- **COIN_GATES_ENTERPRISE** enterprise features are gated via COIN; every contribution is ledgered. ## Constraints

MUST: Govern every user under USERS/ with CANON.md
MUST: Verify identity before granting write access
MUST: Evidence every professional claim in VITAE.md
MUST: Federation identity portable across ORGs
MUST: Gate enterprise features via COIN
MUST NOT: Fabricate credentials
MUST NOT: Expose private user data on public surfaces
MUST NOT: Hardcode user names in law
