

WALLET CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

WALLET is the per-USER economic identity every USER has one, every COIN lives in one, balance is derived from TIMELINE.

hadleylab.org Governed Research. Every claim cited.

Contents

- **ONE_WALLET_PER_USER** one WALLET per USER principal, discovered from {USER}/{USER}.md; no orphan wallets.
- **EVERY_EVENT_APPENDS** every COIN event (MINT, TRANSFER, SPEND, SETTLE, DEBIT:DRIFT) appends to both WALLET and LEDGER.
- **BALANCE_IS_DERIVED** balance is derived from TIMELINE events and never stored independently; WALLET.json is compiled and never hand-edited.
- **SIGNUP_BONUS_IDEMPOTENT** principal promotion triggers a one-time idempotent 500 COIN SIGNUP bonus, one per USER. ## Constraints

MUST: One WALLET per USER principal discovered from {USER}/{USER}.md; no orphan wallets.

MUST: Every COIN event (MINT, TRANSFER, SPEND, SETTLE, DEBIT:DRIFT) appends to both WALLET and LEDGER.

MUST: Balance is derived sum of all TIMELINE events and never stored independently; WALLET.json is compiled from TIMELINE events and never hand-edited.

MUST: SIGNUP bonus (500 COIN) on principal promotion triggers a one-time idempotent 500 COIN SIGNUP bonus, one per USER.

MUST: PYRAMID bonus (500 COIN) to referrer on new principal promotion.

MUST: Ed25519-sign all events after 2026-03-01 re-signatures.

MUST: CLOSE monthly reconcile, snapshot, rotate TIMELINE.

MUST: DEBIT:DRIFT on negative LEDGER gradient governs ledger.

MUST: TRANSFER fee: 5% to TREASURY

MUST NOT: COIN exist outside a WALLET (no orphan values).

MUST NOT: Transfer between WALLETS without both parties.

MUST NOT: Negative balance SPEND fails if insufficient.

MUST NOT: Accept unsigned events after SIGNATURE_CUTOFF.
