

JEKYLL CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

JEKYLL is MAGIC made visible DESIGN is the language, JEKYLL is the compiler, every pixel maps to a governed primitive.

hadleylab.org Governed Research. Every claim cited.

Contents

- **JEKYLL_COMPILEDESIGN** DESIGN is the language and JEKYLL is the compiler that renders it to the web.
- **NO_DIVERGENCE** visuals derive from governed primitives; no ad hoc style drift is allowed.
- **EVERY_PIXEL_GOVERNED** no decoration and no freeform styling; every pixel maps back to a governed primitive. ## Constraints

MUST: Derive visuals from governed primitives (no a
MUST: Keep design language in GOV; runtime renders
MUST: Card icons render inline preceding the card
MUST: Hero demo cycles all governed TALK products
MUST NOT: Introduce visual rules outside governed cont.
MUST NOT: include.X page.X site.data[scope].X site..
