

CONFIG CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

CONFIG is INTEL applied to runtime configuration is governed knowledge, zero hardcoding.

hadleylab.org Governed Research. Every claim cited.

Contents

- **CONFIG_IS_INTEL** runtime configuration is the INTEL primitive applied to runtime; the configure function reads from governed sources.
- **ZERO_HARDCODING** no configuration is hardcoded; every value resolves from GOV at runtime.
- **CONFIG_IS_SERVICE** CONFIG is a TOOLCHAIN service whose function is CONFIGURE; other tools consume its resolved output. ## Constraints

MUST: All configuration through governed files
MUST: Secrets via wrangler secret never in config
MUST NOT: Hardcode API keys or endpoints
MUST NOT: Duplicate config across services

CONFIG / CANON / TOOLCHAIN
