

HYGIENE CANON

2026-03-18

Dexter Hadley, MD/PhD

Hadley Lab CANONIC

Abstract

HYGIENE is drift elimination every file in a governed scope has a reason, the validator proves it.

hadleylab.org Governed Research. Every claim cited.

Contents

- **NO_DRIFT** every file in a governed scope has a reason; files without justification are hygiene violations.
- **VALIDATOR_IS_PROOF** the validator proves the no-drift invariant; hygiene is not asserted, it is measured.
- **HYGIENE_IS_SERVICE** HYGIENE is a TOOLCHAIN service whose function is CLEAN; the primitive is INTEL (what the compiler knows about file purpose). ## Constraints

MUST: Governance files match schema (parsed from t
MUST: Non-schema .md files in governed scopes are
MUST: Constraints inherited from parent are not re
MUST: validate-hygiene runs in build pipeline HAR
MUST NOT: Scope directories contain unreferenced .md f
SHOULD: Shared constraint blocks live at the nearest
